

AmonAI

Build Smarter, not Harder with AI.
Precision with Every Decision.

The construction industry faced a staggering **loss of \$1.8 trillion in 2020 alone, largely due to inefficient data management.**

Daily updates of schedules, blueprints, contracts, reports,... create a complex web that often ensnares even the most experienced construction site managers, leading to delays, overruns, and costly errors.

The Challenge

On a typical construction site, vital information is both abundant and constantly evolving. This reality complicates project management, resulting in up to three hours of lost productivity per manager every day and a significant increase in error rates.

Our Solution

AmonAI is not just an AI assistant; it's your project's central nervous system, seamlessly interfacing with emails, blueprints, Excel sheets, planning documents, and more. It delivers instant, accurate answers and relevant documents, ensuring you're always a step ahead.

Our impact

Save up to 2h per manager daily

Reduce mistakes by up to 65%

Save up to 7% on your construction budget
